

FROM THE HEART WE WORK FOR YOU!

In the family business we are working together with our three kids, we grow together, learn together from our experiences and (sometimes) from our mistakes. Every morning we wake up and every evening we go to sleep thinking about how to create the best quality, innovative product, how to meet the expectations of each and every client, how to become the first choice company for our employees and partners.

SANUS greenhouses are fast growing aluminum greenhouse brand in Europe. We ship greenhouses to customers from snowy north of Norway to sunny south of Italy and Malta. Wide range of sizes with glass, polycarbonate or glass walls + polycarbonate roof coverings allows customer to find best fitting option for them.

Our presence in Europe!

Greenhouse for modern people

FROM THE HEART WE WORK FOR YOU!

DIFFERENT MODELS

Polycarbonate with natural aluminum frame

For plant growers that are looking for optimal price and best solution for their plants. Aluminum frame with stainless steel screws and bolts will ensure longevity of the greenhouse and 6mm twinwall polycarbonate glazing, will protect the plants from direct sunlight and create the best climate for the plants.

Glass walls and polycarbonate roof with painted frame

More elegant version of the SANUS greenhouse. Best of glass and polycarbonate put together. Elegant painted aluminum frame. Polycarbonate roof gives the protection from the sun. Glass walls provides beautiful view inside the greenhouse. This version is used as orangery as well where side glass walls gives outside view.

Glass with painted frame

The centre and the focus of the garden. Beautiful painted aluminum frame with 4mm tempered glass glazing. Blends in with garden structures and at the same time stands out as main focus of it. Perfect option for orangery.

What makes SANUS greenhouses stand out from other manufacturers?

1) **ALUMINUM BASE PROFILE** is included for all SANUS greenhouse models. The height of the base profile is only 6cm and it makes it more stable and easier to step over.

2) **Skylights** (factory made) **and automatic openers are included** (amount depends on the length of the greenhouse) automatic ventilation of the greenhouse is very important for the customer.

3) **All SANUS XL models has a window on the back wall included.** It gives additional ventilation for the greenhouse.

4) **6mm MWS polycarbonate glazing.** EU manufacturer. The UV layer is spread on the polycarbonate sheets, it guarantees that every 1cm² is protected from the UV.

5) There's nothing worse than a half done product for people so all the **POLYCARBONATE SHEETS** and all the **ALUMINUM PROFILES are cut in the factory.**

6) **REINFORCED** aluminum profiles, all the molds for profiles have been designed by us and supplied by EU manufacturers.

7) Greenhouse doors are factory made, durable and esthetic **aluminum handles included.**

8) **Stainless steel screws and bolts.**

9) **Greenhouses are easy to assemble.** We provide DIY manual, with step-by-step instructions with images.

10) **All greenhouses are packed into cardboard boxes.** The longest package for all greenhouses is 2,2m long.

11) **Aluminum we use is produced with 60% recycled materials.** Polycarbonate is produced with up to 70% of recycled material.

12) **Multifoil antidust tape set included.** To protect polycarbonate sheets every sheet is sealed with tapes. Bottom of the sheet is sealed with breathing tape (doesn't allow anything in and allows humidity to leave the sheet) the top of the sheet is sealed with closing tape (does not allow anything in and nothing out)

SANUS greenhouses has 5 YEARS WARRANTY*

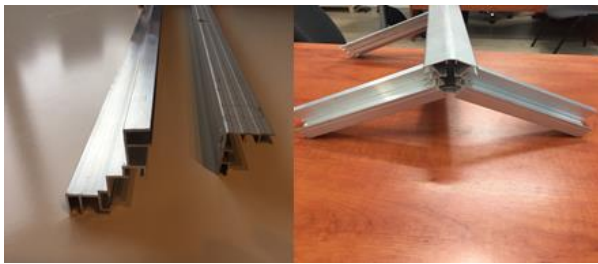

* There are additional terms and conditions

FROM THE HEART WE WORK FOR YOU!

We put our thoughts and time to create the best greenhouse and it all began from the base profile. Every manufacturer sees the importance of the foundation differently. For us, the base is very important, because it makes customers life easier and this is our main goal. We include the base profile for all our greenhouses. The profile itself is shaped D form to make it more stable and suitable for all weather conditions. It is easy to put together and for simple connection to the foundation we include alluminum connection parts. (1st picture: you can see other manufacturer C shaped base profile)(2nd picture: our connected base profile and corner profile).

For every building, corners are one of the most important parts, for greenhouses as well. Greenhouse corners holds the snow load and ensures that greenhouse is stable during heavy winds and storms. Same thing with the roof corners. We created the profiles keeping in mind harsh spring and autumn storms in Lithuania. Our greenhouse is capable of enduring storms, winds, snow, heavy rain. (1st picture: on the left our corner profile, on the right other manufacturer; 2nd picture: roof corners attached to ridge profile).

In these pictures you can see the difference between our(left) and other manufacturers(right) walls and roof profiles. All the addition edges of the profile makes it tougher and more durable.

Nowadays when everyone is always in a hurry, time is preciuos. To save people time all our skylights comes with automatic skylight openers. This technology makes sure that the greenhouse is always ventilating properly. The openers comes from Denmark, manufacturer uses only natural oil for the pistons.

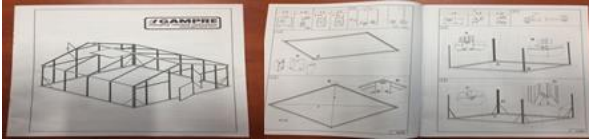

FROM THE HEART WE WORK FOR YOU!

For all SANUS greenhouses we use only 6mm, UV protected, EU manufacturers polycarbonate for glazing. All the sheets are cut and prepared for instalation. Polycarbonate sheets slides into profiles for that reason you don't need to put screws through the sheets.

It is frustrating when you can't find or all the screws and connecting parts are all together. All our screws, bolts, small parts are in separate bags packed neatly in one box.

To make life easier we provide DYI manual with detailed step-by-step instructions and images.
